

Hydraulic sealant

Skupina produkt	503
Barva	Hndá
Výrobce	Staloc
Typ tmelu	Thread
Maximální teplota (°C)	150
Minimální teplota (°C)	-55

Used to seal pneumatic and hydraulic fittings. Can be used as a replacement for PTFE sealing strips when sealing pipes for gas, water, LPG, hydrocarbons, oils and other chemicals. High resistance against corrosion, vibration, impact and temperatures up to 150°C. Certified according to DVGW and EN 751-1. Cures quickly in anaerobic environments, even on passive materials and stainless steel.
